# Disclaimer

This document serves as an overview of the current status and future prospects of the \$Bank coin initiative. It is important to note that the information provided here does not guarantee the fulfilment of the mentioned plans. As the project progresses, our plans will remain flexible and adaptable to ensure success.

\$Bank aims to be a cutting-edge Next Gen digital currency with a wide range of practical applications. Additionally, it will incorporate a gamified non-fungible token (NFT) project.

Please note that all the plans presented in this document are subject to change. Therefore, they should not be used as a basis for making financial decisions.

We believe that collecting should be an enjoyable experience. However, we strongly advise exercising extreme caution when participating in the collection of NFTs, coins, currencies, and collectibles.

The \$Bankers

# Introduction

---

\$Bank originated from a collaboration of passionate Cardano NFT enthusiasts who shared a common vision of establishing a robust community and driving future advancements in the Cardano NFT/DeFi domain.

Leveraging their expertise and experience gained from their respective ventures in the traditional financial realm, the founders embarked on the creation of \$Bank as an innovative NFT project with a carefully designed roadmap.

Opting to launch the \$Bank token instead of a decentralized autonomous organization (DAO) or traditional NFT allowed us to leverage the excitement surrounding meme coins and secure funding for our ambitious NFT and gamification ventures.

Demonstrating our commitment and determination, we swiftly acquired the NFT gaming project named Cardopoly within a mere 30 days of the project's inception, underscoring our dedication to this transformative journey.
